PING ERROR TEST

Explain proper scenario for following ping errors ?

Destination host unreachable

If the echo data send to the router and its check the destination ip on the routing table. If route is not available the router will reply back with destination host unreachable error. same as PC doesn't have route in the system route table same error msg will be showed.

Request timed out

PC1 have route to send a data to Destination PC2. PC1 send the data to PC2. Now PC2 Checks the own route table, if its no route available for transferring the data to PC1. Mean-while PC1 waits for some second for the reply, if its not come the Request time out error will be showed.

Reply from some ip destination host unreachable

Comp1 ----> Router <-----Comp2

Comp1 & Comp2 connected to the router. If comp1 have send the data to the router, now check the routing table weather the route is available for the destination computer ip. If not available the router will reply back to the comp1 as destination host unreachable

TTL expired

Time to to live is used for break the layer 3 looping. Every process between the router , TTL value becomes-1. if TTL value is Zero the TTL msg will appeared
